

Warning

48-VOLT WARNING

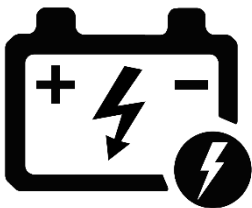

HIGH VOLTAGE CAUTION:

This product operates at 48 volts. This is considered high voltage and can pose a serious risk of electric shock, burns, or fire if not handled properly.

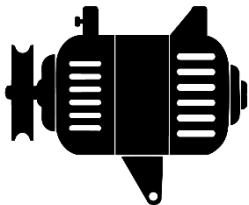

ISOLATION & PPE REQUIREMENTS:

When working on or near a 48-volt system, always use insulated tools and wear appropriate personal protective equipment (PPE).

BATTERY & CHARGING WARNINGS:

Disconnect all battery banks and allow any capacitors to discharge before servicing. Confirm polarity before making connections.

INSTALLATION ADVISORY:

Improper installation of a 48-volt alternator can damage the vehicle's electrical system and create fire hazards.

LABELING & MARKING:

All 48-volt wiring and components should be clearly labeled. Use color-coded or marked cables to indicate voltage level.
